

Consultants, Contracts, and Legal Assistance
Overview of Services in Twin Rivers USD

Type of Assistance	Description	Why Needed	Length of Assistance
Professional Consultation	Groups and individuals that have worked with our leadership team to assist with streamlining our business processes, procedures, infrastructure, technology, and organizational reorganizing.	Merging four existing school system structures and creating a new district is a unique and somewhat rare situation that few people have experienced. The size and complexity of the creation of Twin Rivers hasn't been accomplished in California in more than 60 years.	Most are one-time costs related to the complexity of unification.
Consulting Contracts	These include mandated after school programs, assemblies, staff development, field trips, waste removal, county services, chartered buses for sports teams, software licenses, etc.	Most are everyday costs associated with running school programs.	This amount will not fluctuate much from year to year and many of these costs are funded through State and Federal dollars.
Legal Assistance	Addressing dozens of inherited lawsuits, dealing with an ill-timed construction project, negotiating multiple contracts, special education and charter guidance, preserving educational resources from being used to buy out former administrators.	Our legal assistance has preserved and protected more than \$100 million in funds.	Most of these are one-time costs related to inherited issues and the initial complexity of multiple-contract negotiations.
