

Principal Tdap phone script for week of August 22, 2011

“Due to the extension granted by the California legislature, students in grades 7-12 have until Monday, September 12th to be immunized against Whooping Cough and are encouraged to attend school immediately. The Tdap booster vaccine is available through your family physician and at a free clinic on August 24th at the Rio Linda High School cafeteria from 2:30-6:30 in the afternoon. Additional information is available under “NEWS” on our school web site and on the Twin Rivers web site at www.twinriversusd.org. Once your child has been immunized please bring the shot record to the school office as soon as possible.”
