

campus, students will undergo an active screening, including temperature and review of symptoms. Anyone displaying or reporting symptoms will be sent home with appropriate follow-up prior to return to campus.

**During on-site instruction under waivers for K-6 instruction, or on-site instruction during an approved hybrid model for any grade:** the District shall ask parents to screen students at home prior to coming on campus, and keep student home for any COVID-like symptoms or close exposure to others with COVID-19.

## Employee Daily COVID-19 Self-Checklist

**During all instruction models:** The District has established a passive screener using Catapult EMS and will require all staff to perform a passive screening prior to the start of the workday. Catapult EMS will send all staff an alert every morning. Staff will log-in and be directed to answer a short series of COVID-19 related questions. Staff will be directed to stay home for any COVID-like symptoms or close exposure to others with COVID-19. Catapult will notify only essential personnel of any staff directed to stay home for appropriate follow up action(s).

The screenshot shows a mobile application interface for 'Catapult EMS'. The title is 'Staff Member Selects 'New Report':'. The form is titled 'Employee Daily COVID-19 Self-Assessment'. It includes instructions for staff members and a 'NOTE' about the assessment. The form contains three numbered questions with radio button options for 'Yes' and 'No'. Question 1 asks about fever, loss of smell, cough, muscle aches, sore throat, congestion/runny nose, shortness of breath, chills, and headache. Question 2 asks about close contact with a positive case or quarantine. Question 3 asks about isolation or quarantine by a medical professional. There is a text input field for 'What other details should we know?' and a character count '0 of 500 characters'. Navigation buttons for 'Back' and 'Next' are visible at the bottom.

## Plan for When Someone has Symptoms or Isn't Feeling Well

### Identification of staff or students with symptoms or exposure to COVID-19

Once a student or staff member is identified on a District campus as having COVID-like symptoms or having close contact with a positive case of COVID-19, they will leave the site immediately if possible. If not, they will be moved to a designated area for isolation either outside as appropriate and if being picked up soon, or to the designated symptom room as needed. Symptom rooms/areas are established on all District campuses for use when someone becomes ill with COVID-like symptoms in order to isolate the ill student or staff member until they can safely exit the site.

### Procedures for Symptom Rooms

- Designated Symptom Room/Area and Delivery of Care for those with COVID-19 symptoms. (Note: It is important to maintain privacy and prevent discrimination for those who may have COVID-19, while ensuring separation of symptomatic staff or students to ensure wellness for all.
- Room is fully stocked with necessary supplies including: touchless thermometer, procedure masks (child and adult size), hand sanitizer and pulse oximeter.
- The room should have access to outdoor ventilation.
- There should be a sink and bathroom in the room or nearby.
- Room should have a phone available.
- Physical distancing should be clearly marked.
